

# Energy Insight in a nutshell

Unparalleled energy intelligence

Product series  
*August 2019*

## The power of Energy Insight

### Powering Performance

Energy Insight offers unparalleled real-time, device-level visibility into your entire energy estate that helps you reduce energy costs, proactively manage consumption, and improve operational efficiency

### Powering the Future

Energy Insight delivers a wide range of granular and actionable energy intelligence that can help you gain valuable insight into your energy usage and build an actionable, effective energy strategy

### Powering Resilience

Energy Insight's predictive analytics and sophisticated alerts will help you reduce business risk by ensuring the reliability of your equipment, devices, and operational processes

# Power your way to business efficiency

Businesses are facing pressure from all sides – intense competition, increased risks and threats to established markets from digital disruption and globalisation. At a time when operational efficiency and cost-reduction has never mattered more, turning energy from a commodity cost to a value-adding resource could be just what you need to gain a competitive advantage.

The more you know about your energy, the better you can manage it. By giving you complete visibility of your energy usage, our Energy Insight solution lets you see exactly how your business uses energy right down to individual equipment or device – giving you the granular energy intelligence you need to reduce energy wastage, lower costs, and drive operational efficiencies.

**Our self-powered, wireless, non-intrusive electricity sensors collect real-time energy data and analytics from your devices**

**Our hardware collects real-time data from utility meters (gas, heat, water, and air flow) with pulse outputs, so you can manage a wide range of energy data in a single platform**

## What is Energy Insight?

Our Energy Insight solution offers unparalleled visibility into your entire energy estate by delivering a wide range of granular and actionable energy intelligence in real-time – including electricity, gas, heat, air flow, and water. Effectively and holistically analyse your energy data, manage consumption, reduce spend, improve operational efficiency, and prevent costly downtime with our complimentary energy management platform, PowerRadar® – or the software of your choice – and use this intelligence to make data-driven decisions that power your energy strategy forward.

## The benefits to your business

### **Comprehensively understand your entire energy estate**

Gain complete visibility into how your equipment and operations consume energy with real-time, device-level monitoring of energy.

### **Proactively manage energy consumption and reduce spend**

Real-time visibility of power usage delivers energy intelligence that identifies inefficiencies and wastage in your current operations and enables proactive action to reduce costs.

### **Reduce the risk of device or equipment failure**

Avoid costly downtime and extend the life of your equipment with predictive analytics and sophisticated alerts in PowerRadar® to ensure your business is 'always on.'

## Is Energy Insight right for you?

Energy Insight is ideal for any business that depends on operational performance, driving efficiency, maximising energy spend, and ensuring the reliability of their equipment – businesses that are looking for a simple, powerful and cost-effective way to gain deeper insight into their energy consumption with device-level, real-time energy intelligence that enables them to form data-driven decisions and drive their energy strategy forward.

## Why Energy Insight from Centrica Business Solutions?

Energy Insight can help you turn energy from a commodity cost into a value-driving opportunity for your business. We've already installed over 53,000 of our marketing-leading, self-powered electricity sensors on customer devices around the world, helping to improve business performance.

Our sensor technology includes a complimentary subscription to our simple and powerful energy management platform, PowerRadar®, giving you the flexibility to utilise our software to efficiently visualise and manage the data from your electricity sensors – as well as gas, heat, water, and air flow data from your 3<sup>rd</sup> party utility meters – in a single, holistic view.

Centrica Business Solutions will partner with you to develop an energy strategy that can give you a powerful competitive advantage. Our broad portfolio of products and end-to-end delivery capability means we can provide a single supplier solution to your every energy need.

### Want to know more?

**Our Energy Insight solution is generating new opportunities across all types of industry. Find out how we can help you power new levels of performance today.**
